

About J2EE Assessment Test

Java EE is a collection of technologies and APIs for the Java platform. It supports "Enterprise" applications designed to support critical business requirements. These Enterprise applications can be large-scale, distributed, transactional and highly-available applications. Java Platform, Enterprise Edition (Java EE) is the standard in community-driven enterprise software. Java EE offers a rich enterprise software platform.

J2EE assessment test helps recruiters and hiring managers to assess the candidate's ability to develop web applications on the JEE platform. Interview Mocha's J2EE online test is created & validated by experienced subject matter experts (SMEs) to assess & hire Java EE developer as per the industry standards.

Online J2EE test helps to screen the candidates who possess traits as follows:

1. Ability to perform web application developments on the J2EE platform
2. Ability to work on multiple projects and responsibilities for programming in Oracle Forms/Reports and JDeveloper
3. Knowledge of Java, JEE, XML, AJAX, Web Services, HTML, JavaScript to conceptualize, design, develop and unit test web-based applications
4. Strong knowledge of working on Java Persistence API (JPA)

Java EE interview test will evaluate a candidate's practical knowledge and will identify whether the candidate is ready to be employed. The online J2EE test can be taken by candidates from anywhere in the comfort of their time zone.

Our powerful reporting will give you an instant result and an option to share this result with your recruiting team. You can analyze section wise performance of candidate to gauge his strengths and weaknesses. Features like window violation and webcam proctoring help detect cheating during the test.

Java EE knowledge test may contain MCQs (Multiple Choice Questions), MAQs (Multiple Answer Questions), Fill in the Blanks, Whiteboard Questions, Audio / Video Questions, LogicBox (AI-based Pseudo-Coding Platform), Coding Simulators, True or False Questions, etc.
